

# Department of the Navy Utilities Privatization Quarterly Report

Submitted to
Under Secretary of Defense for
Acquisition, Technology and Logistics
April 2004

#### **EXECUTIVE SUMMARY**

#### INTRODUCTION

This quarterly report provides the status on executing the Department of the Navy's (DoN) Implementation Plan for privatizing utility systems as submitted by the Secretary of the Navy to the Deputy Under Secretary of Defense for Installations in support of the Department of Defense Reform Initiative Directive (DRID) #49 – *Privatizing Utility Systems*. This report updates the planning, scheduling and execution requirements outlined in the Navy and Marine Corps Utilities Privatization Implementation Plans. Included is a detailed listing of the current inventory of Navy and Marine Corps utility systems worldwide and its associated execution status information, a total of 816 systems at 138 activities/installations. All data is current as of 31 March 2004.

#### **SUMMARY OF PROGRESS**

1. <u>Progress Reports.</u> DoN's progress towards meeting the goals established under the DOD Revised Guidance for Utilities Privatization Program of 9 Oct 2002 is summarized below. We have also forwarded an electronic copy of this report, along with its supporting database.

2. <u>RFP Issued Status</u>. ASD directed in December 2003 that a new method of counting be used for this chart. This new method excludes the Security and Economic (Pre-RFP) Exemptions from the RFP Issued chart. RFPs have been issued for 596 of 631 systems, which represent 94% of DoN systems for which an RFP is to be issued. This has not changed from last quarter.

DoN finds the previous RFPs Issued counting methodology, which included all exemptions (to show all systems which have passed this milestone), to be more useful for its own purposes, and has therefore included this data as well. RFPs have been issued (or have been exempted) for 619 of 654 systems, which represent 95% of DoN systems being considered for privatization.

#### Actual and Projected RFPs Issued Cumulative

3. <u>RFP Closure Status</u>. RFPs have closed (or have been exempted) for 613 systems, or 94%. Last quarter, 551 systems, or 84%, had closed. By the next quarterly report, DoN expects to have closed RFPs for 627 systems (96%).

# **Actual and Projected RFPs Closed or Exemptions**

4. <u>SSA Decisions</u>. To date, there have been 144 of 654 systems (22% of DoN systems being considered for privatization) that have either been exempted or have reached SSA decisions. This is an increase from 111 systems (17%) last quarter. DoN expects to meet the proposed OSD Milestone of having achieved SSA decisions for all systems by 30 September 2005. The Navy also expects to have SSA decisions for 40% of systems by 30 September 2004, and 50% of systems by February 2005. It can be noted that the majority of DoN's SSA decisions to date have been to exempt the systems as uneconomical. DoN has always expected that many of the uneconomical decisions would be completed earlier and the systems with actual privatization awards completed later. Historical experience shows it takes more time and effort to analyze and negotiate a successful privatization than it is to complete analysis of an unsuccessful effort.

#### **Decisions This Quarter**

• There were 33 SSA decisions made during the past quarter. These decisions, as well as many of the decisions that were made during the previous quarter, are still working through the chain of command for approval.

### **Actual and Projected SSA Decisions or Exemptions**

5. <u>Privatization Awards</u>. There were no privatization awards made during the last quarter. To date, there have been 15 systems with privatization awards.

7. <u>Deferrals</u>. DoN has several systems that it has granted deferrals (or temporary exemptions). DoN recognizes that OSD guidance does not specifically authorize deferrals. All of the systems deferred by DoN have strong reasons why they should not be privatized at this time, and could have been exempted. However, it is anticipated that the barriers to privatization may be overcome at some point in the future, at which time these systems will be revisited for privatization. The barriers for privatization of these systems are not close enough to being removed to have entered specific plan dates into the schedule. No new deferrals were granted during the past quarter. The deferred systems at Roosevelt Roads will removed from the database during the September baseline adjustment because the installation has recently closed.
